

NIKOLAOS DOGKAS

Göttingen, Germany +49 160 9663 5805 nickdogkas@gmail.com

PROFESSIONAL SUMMARY

Data-Focused Software Developer with experience designing and maintaining ETL pipelines for medical and research data. Skilled in Python and SQL for data extraction, transformation, and validation, including working with healthcare standards such as FHIR. Background in building backend services, REST APIs, and cloud-based systems on AWS (EC2, S3, Lambda), with a strong emphasis on data quality, traceability, and reliability. Experienced in integrating heterogeneous data sources, collaborating with domain experts, and operating systems in production environments.

TECHNICAL SKILLS

Languages: Python, SQL, PHP 8, JavaScript (ES6+), TypeScript, Angular, HTML5, CSS3

Data & ETL: ETL Pipeline Development, Data Transformation, Data Validation, FHIR Data Modeling, Clinical Data Processing, Schema Mapping, Data Quality Assurance

Backend & APIs: Node.js, Express.js, RESTful APIs, JWT/OAuth2 Authentication, API Integration, Cloud Functions

Databases: MySQL, PostgreSQL, MongoDB, MariaDB

Cloud & DevOps: AWS (S3, EC2, Lambda), Firebase, Docker, Kubernetes (basic), Netlify, Render, Vercel, GitLab CI/CD

Testing & Operations: Production Testing, Logging & Monitoring, Unit & Integration Testing

Web & Formats: JSON, XML, SOAP, CSV, HTTP, Responsive Web Design

Project Management: Agile/Scrum, Jira, Code Reviews, Continuous Integration

PROJECT EXPERIENCE

myFlix - Full-Stack Web Application (*React, Node.js, MongoDB*)

Developed a RESTful API with JWT authentication and MongoDB backend. Built a fully responsive React interface with SCSS and Bootstrap. Integrated AI-powered semantic search and personalized recommendations, improving engagement and reducing load time by 25%.

Co-Nekt - Mobile Chat App (*React Native, Firebase*)

Developed a cross-platform React Native application with real-time messaging using Firebase Firestore, supporting offline usage and media sharing.

PROFESSIONAL EXPERIENCE

Universitätsmedizin Göttingen - Medical Data ETL Development

Designed and maintained ETL pipelines for medical data using Python and SQL. Transformed and validated clinical data into FHIR-compliant formats, ensuring data quality, consistency, and traceability. Worked directly with medical data in regulated environments.

Foodsharing IT - Open Source Contributor (*PHP, Vue.js, Symphony, Docker, GitLab*)

Contributing to a large-scale non-profit platform with over 100,000 users. Rebuilt real-time notification architecture, improving reliability by 30%. Enhanced frontend performance and accessibility while optimising GitLab CI/CD pipelines, reducing deployment times by 40%.

Chartering & Operations Management (2012-2024)

Over 10 years of experience in international maritime chartering, operations, and client management. Responsible for full chartering cycles from market analysis to contract execution, negotiation, and customer support. Improved operational efficiency through data-driven analysis, coordinated cross-department workflows, and ensured consistent logistics performance and high client satisfaction in fast-paced, global environments.

EDUCATION

Certificate in Full-Stack Web Development - CareerFoundry

Project-based training focused on JavaScript, TypeScript, React, Node.js, MongoDB, AWS, and DevOps fundamentals.

B.Sc. in Shipping and Transport

Gnosis Certificate in Shipbroking
